About the phone transmission distance as shown

Notices

- Please do not disassemble/reassemble the product to avoid malfunction or fire.
- Please avoid contact with corrosive liquids to avoid damaging the product.
- Do not put it under extreme temperatures, such as below 10 degrees Celsius or above 60 degrees Celsius.
- Keep away from children or pets.
- Do not let the headset touch sharp objects, otherwise it will be scratched easily.
- Please do not use the product in thunderstorm weather to avoid damage or electric shock.
- If you do not use it for more than 1 month, please charge and maintain it regularly for safe operation.

Why can't I search for Bluetooth? Why can't I connect Bluetooth?

- The distance of Bluetooth is 10m, please make sure there are no obstacles. Besides, the phone needs to be close to the headphones.
- If any other phone or device has been connected to the headphones, please unpair it first.
- Please restart the Bluetooth device and try to reset the headphones.*

5

How to reset ?

Reset the headset firstly, restart the phone, delete the connection history, search and then pair again.
 If it still doesn't work, follow these steps:
 1. Turn off the Bluetooth function of your phone. Before turning off, please cancel all previously connected. Cancel all the previously connected device names "YYK-Q63".
 2. Remove the left and right earphones from the case and manually press and hold the button for 5 seconds to power off.
 3. With the device shut down, manually press and hold the multifunction button on the left and right headphones for 10 seconds.
 4. When you hear the prompt tones "Power on" and "Power off" and see the red and blue lights flash twice, put your left and right ears back into the charging case and check whether the charging mode is enabled.
 5. Remove the left and right earphones from the charging case at the same time and connect them to your phone.*

Why does the headset turn off automatically?

Make sure that the headset has enough power. In addition, when you do not use the headphones for 10 minutes, the headphones will automatically disconnect from the Bluetooth connection.

Why can't charge the charging case?

- Make sure that the charging case or phone charger is in good condition and connected properly.
- Poor contact is possible. Use your fingers to press the left and right headphones, and fully connect the charging case of the left and right headphones to the charging case.
- The charging case of the left and right headphones may be dirty, dusty or sweaty. When putting back the charging case for charging, please wipe with alcohol or cloth.
- Please wipe off the sweat and put it back in the charging case for charging, the indicator light will lights up.
- If you hear "Battery Low", please charge the headset. When the LED display number of the charging case reaches "10", please charge the charging case. Be careful not to exhaust the power in the headphones and charging case, because that may shorten the life of the built-in lithium battery.*

Safety Prevention

High-quality headphones, in order to extend the service life, please refer to the following instructions:
 1. Please keep this product away from high temperature, high humidity and corrosive environment.
 2. Please prevent this product from being hit, dropped, bent, soaked, etc.
 3. Please do not disassemble the headphones or the charging case.
 4. Please do not allow this product to be overcharged all the time, this will reduce the service life.
 5. If it causes any discomfort or pain, please stop using this product outright.
 6. Please use a DC 5V-1A adapter certified by a regulated manufacturer. Repeated charging and discharging the headphones will cause the battery performance to decrease over time, which is normal for all rechargeable electronic products.*
